## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 27 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The preamble of claim 27 recites "An apparatus according to claim 16...". However, claim 16 is directed to a system for operating a self-controlled power controller, not an apparatus per se. The Examiner believe Applicant intended claim 27 rather to depend from apparatus base claim 24 and has examined the claims based on that interpretation.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Keller.

Art Unit: 3744

As per claim 1, Keller discloses a power driver switch 40, controller 12 communicating with the switch (figure 1), the controller having a run mode (paragraph 0009, lines 22-23) allowing the switch to change state (paragraph 0009, line 25), whereby the power switch is opened until a new triggering event (restarting the computer or reconnecting USB – paragraph 0009, lines 16-21).

***Allowable Subject Matter***

Claims 2-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 12-26 and 28 are allowed.

Claim 27 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
